

Palletizing – PWO-1000 Bag Palletizer

Palletizing is the almost final element in the product packaging cycle. The automatic system for laying bags on pallets falls within the scope of our offer. The optimum adjustment of solutions of the multiple appliance mechanisms allows to reach the capacity of up to 850 bags per hour. The palletizer is an essential element of the palletizing system, whose configuration depends on specific needs, as well as production and technological conditions of the Customer.

Dependent upon actual needs, it can be additionally equipped with a feeder of empty pallets and an accessory storage for spacers (cardboard or foil). Our scope of activity encompasses counselling, design, performance and service on the Customer's premises. Thanks to our experience and the application of designing with the use of the latest three-dimensional techniques, we are able to smoothly apply our system to suit your needs.

Basic technical parameters:

- Number of pallets in the accessory storage – 16 pcs.
- Lift capacity – 1200kg
- Maximum bag weight – 55kg
- Capacity: 850 bags/hour
- Arbitrary number of pre-set manners of laying bags
- Installed power: 27kW
- Supply voltage: 3x400V; 50Hz
- Air supply: 6-10bar
- Air consumption: about 200l/min

Palletizer: PWO-1000
